Every Framework. One Partner. Trusted Results.

One partner across every framework so you can get certified faster, enter new markets sooner, and build on certifications year over year without starting over.

Schellman is the global leader in independent cybersecurity assessments. We deliver more than 95 types of assessments across 50+ countries, and we combine them under one engagement team. That means one schedule, one point of contact, and one body of evidence, with in-house penetration testing built in.

CONSOLIDATED COMPLIANCE THAT MOVES YOUR BUSINESS FORWARD

Most organizations juggle SOC, PCI, ISO, privacy compliance, AI governance, and federal requirements across several firms, auditors, and assessors. Each firm brings its own contacts, evidence requests, timelines, and standard of quality to navigate.

Consolidating that work with one audit partner keeps schedules coordinated, reduces duplicate evidence collection, and gives your team a single point of accountability from kickoff to report.

- ISO 14001, SUSTAINABILITY
- SOC 1 / SOC 2 / SOC 3
- FEDRAMP, CMMC, NIST 800-171
- PCI DSS & P2PE
- HIPAA, HITRUST, HDS
- ISO 27001, ISO 22301, ISO 9001
- GDPR, CBPR/PRP, SSPA/DPR
- PENETRATION TESTING, AI RED TEAMING
- ISO 42001, AIUC-1, NIST AI RMF

ONE ENGAGEMENT TEAM MEANS ONE:

- PROJECT SCHEDULE
- POINT OF CONTACT
- SHARED BODY OF EVIDENCE
- IN-HOUSE PENETRATION TESTING
- COORDINATING REPORTING

GET IN TOUCH

	MANAGING SEPARATE COMPLIANCE VENDORS	WORKING WITH ONE TEAM FOR A CONSOLIDATED AUDIT
COORDINATION	A separate email chain, meeting cadence, and timeline across every firm	One kickoff, one calendar, and aligned milestones across every assessment
STAKEHOLDERS	More contacts, each with different expectations and communication styles who need to learn your environment	A consistent team who knows your environment, resulting in shorter cycles, smarter planning, and a relationship that scales with your business
CONTRACTS	Different terms, billing cycles, and SLAs to track and negotiate	Fewer agreements and a single billing relationship
QUALITY	Uneven expertise and service levels that need extra oversight	One methodology and one quality bar across all frameworks

WHAT SETS SCHELLMAN APART

Our services span attestation, certification, privacy, federal, healthcare, AI governance, security testing, and more. When you partner with Schellman, your engagement can combine several of these frameworks in a single, consolidated audit program.

STREAMLINED EVIDENCE COLLECTION

Evidence is collected once and mapped across standards. Bundled engagements reuse documentation and reporting across frameworks, reducing repeated requests and the costs that come with them and freeing up your team to focus on product and revenue instead of repetitive audit cycles.

IN-HOUSE PENETRATION TESTING

Many auditors do not offer in-house penetration testing. We do, and our testers work directly with the rest of our compliance teams. FedRAMP, PCI DSS, and ISO 27001 all call for a penetration test, so that work is built into the same program rather than bought from a separate firm.

UP-TO-DATE COMPLIANCE PROGRAMS

Our Red Team assessments help meet the newer testing expectations in FedRAMP. We also test AI and LLM systems and were the first accredited assessors for ISO 42001 for AI management and AIUC-1 for AI agent security.

We track regulatory updates, including proposed healthcare cybersecurity legislation, incident reporting, and new EU cybersecurity rules, and tell clients when those changes may affect their assessments.

REPORTS YOUR CUSTOMERS TRUST

Stronger buyer confidence, faster due diligence, and credentials that help win deals rather than stall them.

FIXED PRICING, NO SURPRISES

Compliance spend you can plan for, defend to your CFO, and scale with confidence.

SIMPLIFY YOUR COMPLIANCE PROGRAM

Tell us which frameworks you need to meet. We will map a single schedule, team, and evidence plan around them.
